

▶ MISSION

To be the company that our customers and employees brag about.

AIM Aerospace designs and manufactures aircraft interior products as well as structural and non-structural composite components.

We set the standard for customer's solutions by:

- Understanding Needs
- Meeting Commitments
- Providing Fair Value
- Delivering Quality

We offer an environment that inspires innovation, professionalism, and teamwork.

▶ OUR QUALITY POLICY

AIM Aerospace is dedicated to the creation and implementation of innovative ideas in the design and manufacture of aerospace products. It is our commitment to provide both quality and value in a manner that meets or exceeds our customers' expectations.

Central to this commitment is a culture of continuous improvement. Key performance metrics are continuously measured and results reviewed so that actions are taken to improve our technology, products, processes and service to our customers.

We assist our employees in doing the best job possible by providing proper education, training and a safe work environment. We encourage employees' participation by demonstrating respect for their opinions while recognizing the need for individual job satisfaction.

▶ OUR QUALITY OBJECTIVES

The quality objectives, established to ensure that the quality policy is fulfilled, are evident in two forms. The Quality Management System procedures and work instructions are one form of quality objectives, as they define and describe how the quality policy is fulfilled. In addition, AIM Aerospace establishes specific annual quality objectives designed to continually improve customer satisfaction through the improvement of the Quality Management System.
